

## Science

I have found you the most amazing website where you can research from <https://spaceplace.nasa.gov/menu/solar-system/> this is designed for children and is full of facts.

This week your learning objective is to: Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.

You can present your work in any way you choose... it could be a book, leaflet, power point- you choose.

For this week's learning you will need to research how we know about day and night. Here are some links to help you... First watch this clip

<https://www.bbc.co.uk/bitesize/clips/zrd9wmn>

This next clip is really interesting <https://www.bbc.co.uk/bitesize/clips/z9qd7ty> it is about a place called Tromsø in Norway - this will provide you with some interesting information for your research- there are many links on this sight...

There is also some information on <https://www.discoveryeducation.co.uk/>
